

# Project Artifacts List – Transcription Aide Platform

This document outlines the final list of project artifacts to be delivered upon the completion of the **Transcription Aide Platform**. It includes all essential components—ranging from source code and deployment scripts to documentation, testing reports, and system diagrams—that collectively represent the outcome of the team's development efforts. Each artifact is described with its purpose and file location to ensure traceability and clarity for future reference or evaluation.

Artifact	Description	File(s)/Location
<b>Source Code Repository</b>	Complete frontend and backend source code with Git structure and branches.	code/frontend/, code/backend/
<b>Database Schema &amp; Configuration</b>	Environment and database setup files.	code/frontend/.env, backend models.py, settings.py (implied)
<b>Unit Test Suites</b>	Unit tests for both frontend and backend functionalities.	code/backend/tests/, code/frontend/src/*.test.js
<b>Deployment Guide</b>	Instructions for local and remote deployment of the system.	docs/technology/Back-end Configuration.md, Front-end Configuration.md
<b>Startup Script (Planned)</b>	Shell script to simplify the backend startup process, replacing manual multi-step configuration.	To be added under `code/backend/scripts/start_backend.sh`
<b>User Manual</b>	End-user instructions on using transcription platform.	To be finalized / derived from frontend features
<b>Software Architecture Diagrams</b>	Component, deployment, sequence, class, and ER diagrams of the system.	docs/architecture/*.md and imgs/Architecture diagram/
<b>Requirement Specification</b>	Detailed Software Requirement Specification (SRS) with user stories.	docs/requirement/Software Requirements Specification.md
<b>UI Prototypes</b>	Low and high fidelity prototypes with user interaction narratives.	prototypes/Low Fidelity Prototype/, High Fidelity Prototype/
<b>Meeting Minutes</b>	Records of client meetings, sprint planning, review and retrospective.	docs/meetings/

Artifact	Description	File(s)/Location
<b>Sprint Boards &amp; Task Records</b>	Kanban boards, sprint task assignments and progress tracking.	External link + Sprint planning documents
<b>Risk Management Plan</b>	Identified project risks with corresponding mitigation strategies.	docs/risk management/Risk Management Plan.md
<b>Usability Test Results</b>	Testing plans and analysis of user interactions.	tests/Usability Test/
