

# Narrative of High Fidelity Prototype

The high fidelity prototype mainly contains three flows: Transcribing, Processing, and History.

## Link of the high fidelity prototype:

<https://www.figma.com/design/zgg9tm6Nl6iH9f8ilOzibW/TAP-High-Fidelity?node-id=0-1&tk=jlHfZw31TVJB1zR-1>

## Flow 1: Transcribing

- **Input Email Address:** The user is first prompted to enter their email address in a dedicated input field. This email address will be used to send the transcription results. The system provides real-time validation, displaying a green check-mark next to the input field once a valid email format is entered, indicating that the user can proceed.

The image displays two screenshots of a web form for transcription, showing the state before and after email validation.

**Top Screenshot (Initial State):**

- Header:** A dark blue header with a microphone icon and navigation links: "About", "Transcription", and "History".
- Input your Email Address:** A section with the instruction "Please enter your email address to receive your transcription results." and an empty text input field.
- Select a format for the output file:** A dropdown menu showing "docx." with a downward arrow.
- Select transcription language:** A dropdown menu showing "English" with a downward arrow.
- Upload:** A section with the text "Our platform supports the following file formats: WAV (.wav), MP3 (.mp3), M4A (.m4a), FLAC (.flac), OGG (.ogg), and AAC (.aac)." and a large blue box with a cloud upload icon and the text "Drag a file here or Choose a file to upload".
- Confirm:** A grey button labeled "Confirm".

**Bottom Screenshot (After Validation):**

- Input your Email Address:** The text input field now contains "thisaddress@email.com" and has a green checkmark to its right, indicating successful validation.
- Select a format for the output file:** The dropdown menu remains "docx.".
- Select transcription language:** The dropdown menu remains "English".
- Upload:** The upload section remains the same.
- Confirm:** The "Confirm" button remains.

- **Select Output File Format:** The user can choose their desired file format for the transcription output from a drop-down menu. Available options include .docs, .txt, and .pdf, allowing the user to select the format that best suits their needs.

## Flow 2: Processing

- **Processing Page:** After the user submits the files for transcription, they are redirected to the Processing Page. Here, the system displays the status of each file being processed. A progress bar is shown next to each file, indicating the percentage of completion. This real-time feedback helps users monitor the progress of their transcription tasks.

While the files are being processed, users are given two options:

1. **Go to History Section:** Users can navigate to the History section to view the status of previous transcriptions or manage their completed tasks.
2. **Transcribe a New Task:** Users can initiate a new transcription task without waiting for the current task to finish, enabling multitasking and improving efficiency.

[About](#)[Transcription](#)[History](#)

### Processing ...

The file(s) is currently being processed. Once the transcription is complete, it will be automatically sent to your email address.

 audio1.docx 

Completed 100%

 audio2.txt 

Processing 88 %

[Go to History Section](#)

[Transcribe a New Task](#)

- **Completion Indicator:** Once a file has been fully transcribed, the progress bar changes to a "Completed" status. This visual indicator reassures users that the transcription process was successful.

After all files are processed, users can choose to:

1. Download the Transcribed Files: Access the files directly from the History section.
2. Review the Transcriptions: Users can open the transcribed files directly within their respective applications (e.g., Word for .docx files or a text editor for .txt files) to review and utilize the content.

[About](#)[Transcription](#)[History](#)

### Transcription Finished

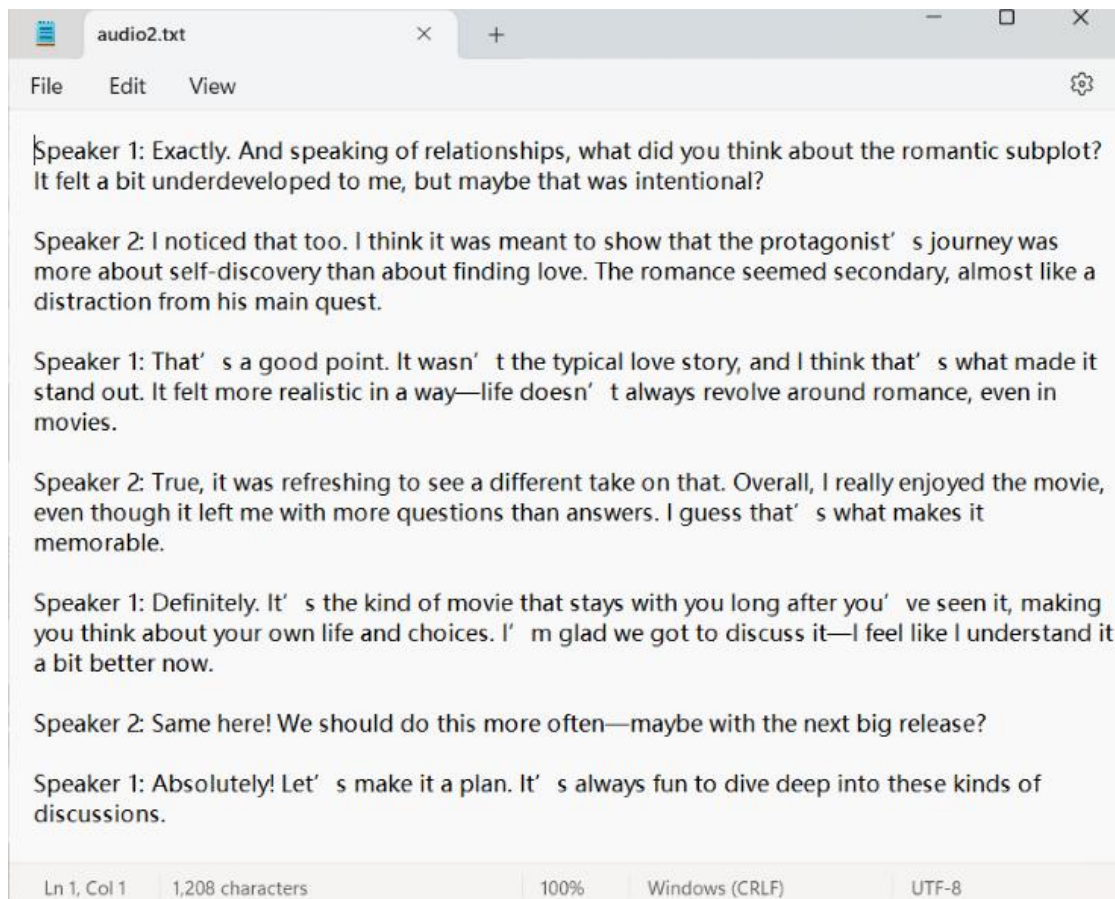

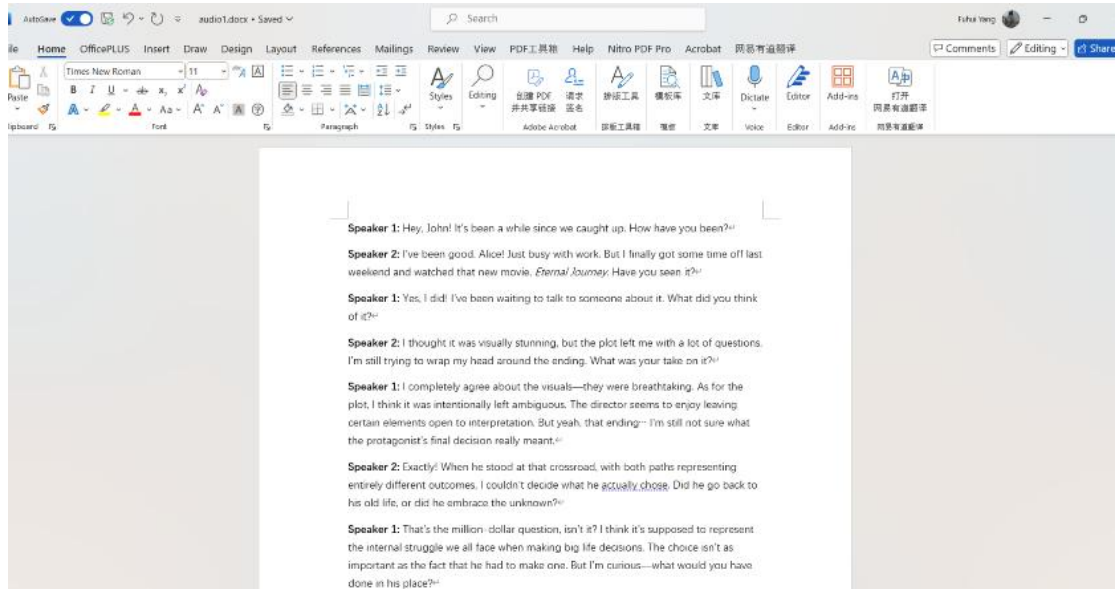

The following file(s) have been transcribed and have been sent to the email address: **thisaddress@email.com**.

File NAME	TASK FORMAT	CREATION DATE	EXPIRY DATE	OUTPUT TYPE	STATUS	DOWNLOAD
audio1	Audio	21 Aug 2024	21 Sep 2024	docx	Completed	
audio2	Audio	21 Jul 2024	21 Sep 2024	txt	Completed	

[Go to History Section](#)

[Transcribe a New Task](#)

- Error Handling:** If a file fails to process, a red "X" icon and the word "Failed" appear next to that file, indicating an issue. Once a file is transcribed, the progress bar will indicate "Completed" in green. If a file fails, it is marked as "Failed" in red. This dual feedback system helps users quickly identify which tasks were successful and which need attention.

Processing ...

The file(s) is currently being processed. Once the transcription is complete, it will be automatically sent to your email address.

Flow 3: History

- **Input Email Address:** Users are prompted to enter the email address they used for transcription. This step is necessary to verify their identity and display the transcription history. The input field provides real-time validation, ensuring the email format is correct

before users can proceed.

## History Transcriptions

This section allows users to access their previously transcribed files. To maintain efficient storage and remove outdated data, the system automatically deletes transcriptions older than 30 days, ensuring that only recent and relevant files are retained for easy access.

### Input your Email Address

Please enter the email address you used for transcription. This will allow you to check your past transcription history.

File Edit View

Speaker 1: Exactly. And speaking of relationships, what did you think about the romantic subplot? It felt a bit underdeveloped to me, but maybe that was intentional?

Speaker 2: I noticed that too. I think it was meant to show that the protagonist's journey was more about self-discovery than about finding love. The romance seemed secondary, almost like a distraction from his main quest.

Speaker 1: That's a good point. It wasn't the typical love story, and I think that's what made it stand out. It felt more realistic in a way—life doesn't always revolve around romance, even in movies.

Speaker 2: True, it was refreshing to see a different take on that. Overall, I really enjoyed the movie, even though it left me with more questions than answers. I guess that's what makes it memorable.

Speaker 1: Definitely. It's the kind of movie that stays with you long after you've seen it, making you think about your own life and choices. I'm glad we got to discuss it—I feel like I understand it a bit better now.

Speaker 2: Same here! We should do this more often—maybe with the next big release?

Speaker 1: Absolutely! Let's make it a plan. It's always fun to dive deep into these kinds of discussions.
