Low Fidelity Prototype

The low-fidelity prototype presents the core functionalities and layout of the platform, focusing on user interface design and workflow.

1. **Legend Description**

Element	Description
LOGO	Represents the company's logo, typically returns the user to the homepage when clicked.
⊗	Images/Icons/Pictures
Lörem ipsum kvasirtad sön huruvida pohönera set. Båbire ultragen	Placeholder text will be replaced with instructions or explanations in the final design.

2.   Homepage/Dashboard

The homepage prototype includes a logo at the top, accompanied by navigation links to essential sections such as Home, Transcription, Queue & History, About Us, and language selection. The main page provides a brief introduction to the transcription software and how it works. The footer includes links to Terms & Conditions, Privacy Policy, and other legal information relevant to the platform.

French

The main content is organized into four numbered steps, guiding the user through the process of using the transcription service (This section is corresponding to the epic 1 of user story from 1.1 to 1.5).
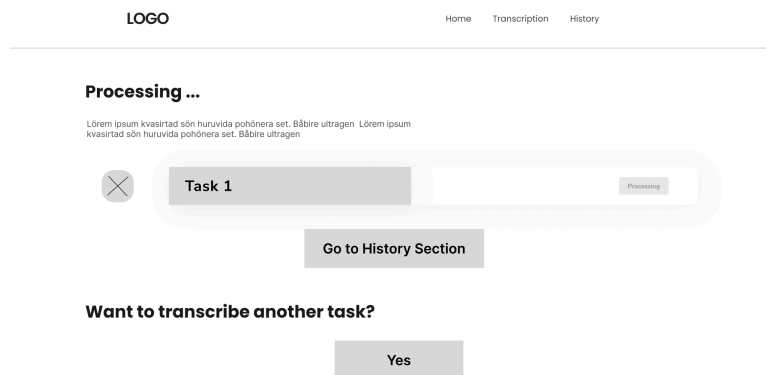

3.1.   Upload Section: This is the file upload area, where users can drag and drop files or select files to upload using the "Select Files to Upload" button.

3.2.   Input your Email Address: Below the upload section, there is a field for the user to input their email address. This step ensures that the user can receive their transcription results via email.

3.3.   Select a Format for the Output File: Users are prompted to choose the format for the transcription output. A dropdown menu is provided, with "docx." currently selected.

3.4.   Select Transcription Language: This section allows the user to select the language for the transcription. Users can select the language for transcription from a dropdown menu with options like English, Chinese, and French.

AAfter users upload the files to be transcribed, the page displays the status of the uploaded files.

The history page serves as an admin portal where users can review and manage past transcription tasks. Secure access is provided via email links, ensuring that only authorized users can enter the portal.

Once the access is approved, the history portal appears with the history transcriptions table and offers a comprehensive view of all past transcription tasks, complete with status updates and download options. The table includes columns for ID, Task Name, Upload Type, Date, File Type, Status, and the "Download" icon. This functionality is critical for users who need to revisit or manage their transcription records.
